LEADERSHIP—Good government doesn't just happen. It takes ideas and the energy to bring those ideas to life. This year's Republican candidates come from a rich tradition of public service. They have personally demonstrated their commitment to Westfield in leadership roles throughout the community. The next century in Westfield will require leaders with character, integrity and the energy to make this community a great place to live. During this campaign Republican candidates will demonstrate for you the ideas and leadership capabilities with which they will lead Westfield into the future.

QUALITY OF LIFE—Our town is blessed with an excellent quality of life developed over two centuries. Many of the benefits we enjoy result from the hard work of citizen volunteers who invest their time and spirit in the continued growth of our way of life. Republican candidates for office all have a record of community service and involvement which defines their character and qualification for the important offices they seek.

GOVERNMENT'S ROLE IN THE NEXT CENTURY- Many things will be important in the next century. Some, like education for our children, have always been important. New things, such as the use of technology to help deliver government services more efficiently, are on the horizon. The future of our Downtown will require continuing attention. The key to meeting the challenges of the next century is responsible political leadership with the vision and courage to meet those challenges. The Westfield Republican Party is committed to providing that leadership and asks for your vote on November 4 to continue Republican leadership for your Town Council.

VOTE REPUBLICAN NOVEMBER 4TH!
