

# JFSCNJ Installs Officers; Fred Kessler Is President

AREA — Jewish Family Service of Central New Jersey (JFSCNJ) hosted its Annual Meeting on June 15 via Zoom, where new officers and continuing board members were installed. Volunteer Heroes of Covid-19 were recognized along with staff who have worked at JFSCNJ for 10 to 15 years.

Fred Kessler

The following individuals have been elected to the Executive Committee under the leadership of Fred Kessler, Esq., who has been elected JFSCNJ president for a two-year term. Mr. Kessler succeeds Jodi Zolkin Kiste, who completed her two-year term.

President: Fred Kessler, First Vice-President: Ruth B. Margolin, Vice-Presidents: Jennifer Marshall Sofield and Arielle Traub, Treasurer: Mark Hauptman, Assistant Treasurer: Gerri Rothfleisch, and Secretary: Donald Shapiro.

Mr. Kessler is special counsel to the Saiber LLC law firm in Florham Park, where his areas of concentration include mediation and arbitration. He joined the JFS board in 2014, shortly after his retirement as a Judge of the Superior Court of New Jersey. Mr. Kessler served in the Civil and Family Divisions in Union County

before being appointed as Presiding Judge of the Chancery Division. Prior to his judicial service, he was a commercial litigator for more than 25 years with two Newark law firms.

Mr. Kessler graduated with honors from Brandeis University and Harvard Law School. He is a member of the board of directors of the Brandeis Alumni Association and previously served as president of its New Jersey chapter. He also served as president of the Harvard Law School Association of New Jersey. His prior public service positions include chairman of the Cranford Planning Board, vice-president of Temple Beth-El Mekor Chayim in Cranford, and board member of the YM-YWHA of Union County.

Mr. Kessler and his wife, Roberta, reside in Cranford. They have two children, Matthew and Lisa. Mr. Kessler is proud to continue a family tradition of service to JFS. His father, Albert Kessler, was the first president of JFS, and his mother, Bernice Kessler, was a longtime board member.

For more information about JFSCNJ's services, call Jewish Family Service of Central New Jersey at (908) 352-8375 or email info@jfscentralnj.org.

# Obituaries

## Jean Sawyer Kahan, Microbiologist; Scotch Plains Resident For 40 Years

Jean Kahan passed away on Friday, June 19, of natural causes, in Marlton, N.J. She is survived by her husband of 52 years, Fred; stepson, Dan; daughter-in-law, Susan, and two grandsons, and by her brother, George, and four nephews.

Jean Sawyer Kahan

Jean was born in 1941 and grew up in New Providence, N.J. She majored in chemistry at Bucknell. At a time when few U.S. firms would employ a single young woman, she sought work abroad at CIBA in Basel, Switzerland, then briefly at Columbia P&S prior to her hire in 1966 as a biochemist by the Merck Research Laboratories in Rahway, N.J. She joined Merck in the same week as her future husband. They met, married and collaborated during a 27-year career in the discovery and development of antibiotics. She was the principal discoverer of Thienamycin, the prototype for the family of carbapenem antibiotics

used since the mid 80s to combat antibiotic-resistant bacterial infections in hospitals. Merck's product, PRIMAXIN, is included in the World Health Organization's list of essential medicines.

Upon retirement from her productive career, Jean succeeded the founder of the Sjögren's Syndrome Foundation as its President, qualified as a Master Gardener of Union County, and for decades sang with the Choral Art Society of New Jersey in Westfield. Her hobbies included cultivation of miniature orchids under lights and pursuing birds and butterflies with her husband. She marveled at all creatures in nature and will be sorely missed. In these times of need, she would wish you to direct any tributes in her memory to the Community FoodBank of New Jersey.

## Summit Foundation Donates \$15K to Caring Contact

WESTFIELD — The Summit Foundation has donated \$15,000 through a grant to the Westfield-based crisis listening line Caring Contact. Julie Keenan, president of the board of trustees of the Summit Foundation, presented the grant to Caring Contact on June 11.

For nearly 50 years, the Summit Foundation has served the Summit community by growing and granting philanthropic resources to address local needs. During the last 10 years the Foundation has invested \$8.6 million through grants, scholarships and donor-advised distributions.

"The Summit Foundation's generosity will ensure that Caring Contact has more trained listeners available to answer hotline calls," said Janet Sarkos, Caring Contact's executive director. "We will be able to quickly and effectively prioritize the needs of our most fragile callers, increasing the number of people who benefit from contacting us, and reducing the incidence of suicide in Summit and

the surrounding area. We are the first line of defense against suicide. Caring Contact is truly thankful for this contribution from the Summit Foundation," Ms. Sarkos added.

Caring Contact's goal for 2020 is to continue building hotline capacity to more effectively meet the increased number of crisis calls coming in on the National Suicide Prevention Lifeline. This is particularly important as the Federal Communications Commission is moving to implement a three-digit code (988) for access to the Lifeline in 2021. The entire Lifeline network of 170-plus centers is focused on building capacity to meet the anticipated increase in calls as a result of this change.

The Summit Foundation's grant provides crucial support for this effort in North-Central New Jersey. Caring Contact is an award-winning, volunteer-staffed, caring and crisis hotline providing active listening support and best-in-class education to the Central and Northern New Jersey community. It serves those in emotional distress and educates communities about the power of personal connection. Caring Contact is affiliated with CONTACT USA, the National Suicide Prevention Lifeline and the American Association of Suicidology.

Anyone in crisis, or who knows someone who is, and needs someone to listen is encouraged to call Caring Contact at (800) 273-8255. To learn more, visit caringcontact.org.

## Series to Address Loss During COVID

AREA — Jewish Family Service of Central New Jersey (JFSCNJ) will present a six-session support group entitled "Coping with the Loss of a Loved One During Covid-19." It will take place on Wednesday evenings, July 8, 15, 22, 29, August 5 and 12, from 7:30 to 8:30 p.m., via Zoom. Nancy Rosenthal, a Licensed Clinical Social Worker and JFSCNJ therapist, will lead the program.

difficulty of coping with the grief of a sudden loss. It is free and open to the entire community. This program is funded by grants from the Healthcare Foundation of NJ, the Jewish Federation of Greater MetroWest NJ and Northfield Bank.

Interested persons are asked to email Nancy Rosenthal at nrosenthal@jfscentralnj.org, or to call (908) 352-8375, extension no. 234, with questions and to receive a Zoom link for the group.

## Walter J. Driscoll 1940-2020

Walter J. Driscoll, of Mountainside, N.J., formerly of Westfield, passed away peacefully in his sleep on Monday, June 22, 2020. His last day was spent tending to plants and sitting in the yard with his wife of 56 years, Susan, his high school sweetheart, before laying down in the afternoon for one last nap. It was a good last day. He was 79 years old.

Born in Brooklyn, N.Y., in 1940 to Walter and Agnes Sullivan Driscoll, Walt grew up in Queens, N.Y., with brothers Thomas and Larry, and had many fond memories of getting into fun — or trouble, depending on who you asked — at Pine Lake in the summer. He was a member of his high school swim team, and developed a lifelong love of the water and the beach. He and Susan met on the handball court and married in 1963. They moved to Westfield, N.J., in 1967, where they became part of a close-knit community and organized the first neighborhood block party.

After a typography apprenticeship, Walt was quickly appointed foreman at Primar Printing, where he worked for many years before opening his own digital printing business. He ended his printing and graphic arts career at Johnson & Johnson, endearing himself to co-workers with his perfectly blended mix of wit and humor. Taking an early interest in computers, he taught himself programming languages and maintained a master keying locksmith software business on the side.

Walt enjoyed leaving work on time so that he could focus on things that were important to him. He loved telling jokes good and bad, although he didn't agree with that distinction and appreciated groans

as much as laughs. He had an extraordinary memory and was difficult to beat at Trivial Pursuit. A lifelong learner, he loved reading — and giving impromptu lectures — about history, religion, and astronomy. He loved grilling, tending to his ever-expanding garden, and drinking wine (in combination with all of the previous). More than anything, he loved his family: his wife, Susan; daughters, Carol and Kathy; son, Dan; sons-in-law, Dan and Stephen, and daughter-in-law, Jenn; grandchildren, Justin, Will, Shaye, Anna, Nolan and Betheny; sister-in-law, Debbie, and her family, Bill and Jamie. He loved to get together with his brother- and sister-in-law, Jim and Diane Martin of Houston, and their children, as well as his brother, Larry, and sister-in-law, Margaret, of Pennsylvania, and their daughter, Erin. He was predeceased by his brother, Thomas Driscoll, and niece, Cindy Driscoll.

Irreverent and (healthily) cynical of institutions, Walt is remembered by friends and neighbors as caring and always willing to help, generously lending expertise, advice, or time and labor whenever it was needed.

Walter's family will commemorate him whenever they spend time together or go out of their way to help others, and probably also whenever someone begins to tell a joke so bad they groan and try to leave the room. Due to the current conditions around COVID-19, a private viewing and gathering to celebrate his life was held for immediate family. Anyone wishing to make a donation in his honor can do so to The Community FoodBank of New Jersey in Hillside, N.J.

July 2, 2020

## Library to Present Original 'Real Housewives' of N.J.

SCOTCH PLAINS — The Scotch Plains Public Library invites members of the community to join the library staff for "The Real Housewives of New Jersey: Early American Women and Their Kitchen Gardens" via Zoom on Sunday, July 12, at 2 p.m.

Garden historian Lesley Parness will take participants back to the colonial era to introduce the original "Real Housewives." Kitchen gardens in the 1700s fed, healed and clothed early-American families. The 18th-century "huswife" skill set included "physicke, cookery, distillation, perfumery, the making of wool, hemp, flax, dyes, brewing, baking," and, of course — gardening.

Growing plants (both Native American and from their homelands), these women turned their soup pots into the "melting pot" that is America.

Ms. Parness has worked in public gardens in America and abroad for the past four decades. She is a founding member and past president of Garden State Gardens, a consortium of New Jersey Public

Gardens. She writes a column for *Gardener News Magazine*, is the consulting horticulturist at Jersey City's Berry Lane Park and is a founding member of the Harriet Tubman Museum of Cape May, for which she is designing a medicinal plants garden. She is a frequent speaker at garden clubs, historical societies and libraries throughout the mid-Atlantic region.

Advance registration is required for this online program. Registered participants will receive a Zoom link via email a day or two in advance. The registration form, and information about the entire summer reading program, can be found on the library's website, scotlib.org.

The Scotch Plains Public Library is grateful to the Friends of the Scotch Plains Public Library for their generous support of the entire summer reading program.

<b>BOROUGH OF GARWOOD</b>					
<b>ORDINANCE NO. 20-08</b>					
<b>ORDINANCE OF THE BOROUGH COUNCIL OF THE BOROUGH OF GARWOOD, COUNTY OF UNION, NEW JERSEY, IMPLEMENTING ARTICLE IX OF THE BOROUGH OF GARWOOD'S HEALTH CODE ENTITLED, "GREASE TRAPS"</b>					
<p><b>WHEREAS</b>, in an effort to prevent blockages, obstructions, and backups in the sanitary sewer system of the Borough of Garwood (the "Borough"), the Borough wishes to create a new Borough Ordinance to provide for and address this issue as well as related issues with the Borough's sanitary sewer system.</p> <p><b>NOW THEREFORE, BE IT ORDAINED</b> by the Borough Council of the Borough of Garwood, County of Union, New Jersey that:</p> <p><b>Section 1.</b> Article IX, "Grease Traps," of Chapter 99, "Health and Sanitation," of the Borough of Garwood is hereby established as follows:</p>					
<p><b>§ 99-51 Purpose.</b></p> <p>The purpose of this section is to control discharges into the public sewerage collection system and wastewater treatment plants that interfere with the operations of the system, cause blockage and plugging of pipelines, interfere with normal operation of pumps and their controls, and contribute waste of a strength or form that either causes treatment difficulties or is beyond the treatment capability of wastewater treatment facilities.</p>					
<p><b>§ 99-52 Definitions.</b></p> <p>"Grease" shall mean material composed primarily of fats, oil and grease (FOG) from animal or vegetable sources. The terms fats, oil, and grease shall be deemed as grease, by definition. Grease does not include petroleum-based products.</p> <p>"Grease trap" shall mean a device for separating and retaining waterborne greases and grease complexes prior to the wastewater exiting the trap and entering the sanitary sewer collection and treatment system. These devices also serve to collect settleable solids, generated by and from food preparation activities, prior to the water exiting the trap and entering the sanitary sewer collection and treatment system.</p> <p>"Food service facilities" shall mean those establishments primarily engaged in activities of preparing, serving, or otherwise making available for consumption foodstuffs and that use one or more of the following preparation activities: cooking by frying (all methods), baking (all methods), grilling, sautéing, roasting, broiling (all methods), boiling, blanching, roasting, toasting, or poaching. Also included are infrared heating, searing, barbecuing, and any other food preparation activity that produces a hot, non-drinkable food product in or on a receptacle that requires washing. These facilities include restaurants, cafeterias, hotels, motels, hospitals, nursing homes, schools, grocery stores, prisons, jails, churches, camps, caterers, manufacturing plants, or any other sewer users as determined by the plumbing sub-code official who discharge applicable waste. Exempted herefrom are self-contained single-family living units.</p> <p>"User" shall mean any person or establishment including those located outside the jurisdictional limits of the Borough who or which contributes, causes, or permits the contribution or discharge of wastewater into the Borough's wastewater collection or treatment system, including persons who contribute such wastewater from mobile sources, such as those who discharge hauled wastewater.</p> <p>"Oil/water separator" shall mean an approved and industry standard system that is specifically designed and manufactured to separate oil from water. The system shall allow the oil to be collected and removed on a regular basis as to prevent it from being discharged into the wastewater collection system. Only oil/water separators manufactured for that specific operation will be approved. Adequate support literature from the manufacturer will be required so as to allow a proper review by the Borough and any individual so authorized by the Borough.</p> <p>"Sanitary Sewer" shall mean and refer to the sanitary system of the Borough of Garwood and the Rahway Valley Sewerage Authority.</p>					
<p><b>§ 99-53 General Criteria.</b></p> <p><b>A. Installation Requirements:</b> All existing, proposed, or newly remodeled food service facilities inside the Borough of Garwood shall be required to install, at the user's expense, an approved, properly operated and maintained grease trap, capable of preventing accumulation of grease in the sanitary sewer system of the Borough of Garwood.</p> <p>1. Such above captioned establishments who do not possess a proper grease trap in accordance with the provisions of this Chapter shall have such grease trap installed within ninety (90) days of the effective date of the enabling Ordinance. Upon the expiration of the ninetieth (90<sup>th</sup>) day following the effective date of the enabling ordinance an establishment not possessing a proper grease trap in accordance with this Chapter shall be deemed in violation and shall be subject to fines pursuant to Section 99-57 of this Chapter.</p> <p><b>B. Sanitary Sewer Flows:</b> Sanitary sewer flows from toilets, urinals, lavatories, etc. shall not be discharged into the grease trap. These flows shall be conveyed separately to the sanitary sewer service lateral.</p> <p><b>C. Floor Drains:</b> Only floor drains which discharge or have the potential to discharge</p>					
<p>grease shall be connected to a grease trap.</p> <p><b>D. Garbage Grinder/Disposers:</b> It is recommended that solid food waste products be disposed of through normal solid waste/garbage disposal means. If a grinder/disposal is used it must be connected to the grease trap. The use of grinders is discouraged since it decreases the operational capacity of the grease trap and will require an increased pumping frequency to ensure continuous and effective operation.</p> <p><b>E. Dishwashers:</b> Commercial dishwashers must be connected to the grease trap. Dishwashers discharge soap and hot water which can melt grease and allow it to pass through an undersized grease trap. Traps must be sized accordingly to allow enough detention time to allow water to cool and grease to solidify and float to the top of the trap.</p> <p><b>F. Locations:</b> Grease traps shall be installed upstream from the sanitary sewer service lateral connection. This will allow easy access for inspection, cleaning, and removal of the intercepted grease at any time.</p> <p><b>G. Pass Through Limits:</b> No user shall allow wastewater discharge concentration from grease trap to exceed 100 Mg/PL (milligrams per liter) as identified by EPA method 1664A.</p>					
<p><b>§ 99-54 Design Criteria.</b></p> <p><b>A. Construction:</b> Grease traps/interceptors shall meet the specifications of Chapter 6 of the current National Standard Plumbing code/N.J.A.C. 5:23-3.15. All grease removal devices or technologies shall be subject to the written approval of the Construction Code Official, their designee(s), or any other official as directed by the Borough. Such approval shall be based on demonstrated removal efficiencies of the proposed technology.</p> <p><b>B. Access:</b> Access to grease traps shall be available at all times requested by the Construction Code Official, their designee(s), or any other official as directed by the Borough, to allow for maintenance and inspection.</p> <p><b>C. Load-Bearing Capacity:</b> In areas where additional weight loads may exist, the grease trap shall be designed to have adequate load-bearing capacity. (For example: vehicular traffic in driving or parking areas).</p>					
<p><b>§ 99-55 Grease Trap Maintenance.</b></p> <p><b>A. Cleaning/Pumping:</b> The user, at the user's expense, shall maintain all grease traps to assure proper operation and efficiency. Maintenance of grease trap shall include the complete removal of all contents, including floating materials, wastewater, and bottom sludge and solids. This work shall be performed by a qualified and licensed hauler. Decanting or discharging of removed waste back into the trap from which it was removed or any other grease trap, for the purpose of reducing the volume to be disposed, is prohibited. This service shall also include a thorough inspection of the trap and its components. Any needed repairs shall be noted. Repairs shall be made at user's expense.</p> <p><b>B. Cleaning/Pumping Frequency:</b> The grease trap must be pumped out completely a minimum of once every four (4) months, or more frequently, as determined by the Borough, through the Health Officer, or their designee(s), or any other official as directed by the Borough, as needed to prevent carry over of grease into the sanitary sewer system.</p> <p><b>C. Disposal:</b> All waste removed from each grease trap must be disposed of at a facility approved to receive such waste in accordance with the provisions of this program. In no way, shall the materials pumped from the grease trap be returned to any private or public portion of the Borough of Garwood's sanitary sewer collection system. All materials pumped from grease traps must be tracked by a manifest, which confirms pumping, hauling, and disposal of waste. The customer must obtain and retain a copy of the original manifest from the hauler.</p> <p><b>D. Maintenance Log/Records:</b> A grease trap cleaning/maintenance log indicating each pumping for the previous twenty-four (24) months shall be maintained by each food service facility. This log shall include the information contained in Subsection E and shall be kept on-location for inspection. Said log shall be made available to the Health Officer, or Superintendent of Public Works, or Municipal Engineer or their designee(s), or such other person as designated by the Borough, upon request.</p> <p><b>E. The maintenance records shall include the following information:</b></p> <ol style="list-style-type: none"> <li>(1) Facility name, address, contact person, and telephone number.</li> <li>(2) Company name, address, telephone number, and contact name of person responsible for performing the maintenance, cleaning, pumping, or repair of grease trap.</li> <li>(3) Types of maintenance performed.</li> <li>(4) Dates maintenance was performed.</li> <li>(5) Date of next scheduled maintenance.</li> <li>(6) Copies of manifests.</li> </ol>					
<p><b>§ 99-56 Inspections.</b></p> <p><b>A. Generally:</b> In consideration for continued use of its sanitary sewer system, The Borough of Garwood shall reserve the right to periodically conduct routine inspections of the grease traps/interceptor(s) of any food service facility during regular business hours. During such inspections, the Borough of Garwood shall have the right to inspect (i) any food preparation areas (ii) any records maintained pursuant to this section (iii) all grease traps/interceptors which shall be opened upon request, and (iv) all wastewater lines from the establishment to the sanitary sewer system, which may be accomplished by use of a line camera.</p>					
<p>Upon written notification by the Health Officer, or Superintendent of Public Works, or Municipal Engineer, or their designee(s), or such other person as designated by the Borough, the user shall be required to perform the maintenance and keep records of said maintenance within fourteen (14) calendar days. Upon inspection the user may be required to install, at his expense, additional controls to provide a complete system which prevents discharges of undesirable materials into the wastewater collection system.</p> <p><b>B. Inspection Fees:</b> There is hereby established a fee for re-inspection of any grease trap found in violation of this Chapter in the amount of \$250 for the first offense, \$500 for the second offense, and \$1,000 for the third offense. Any time the retail food establishment is found in violation during the re-inspection, there shall be an additional fee of \$150.</p> <p><b>C. Blockage:</b> Whenever the Borough of Garwood discovers a blockage of the sanitary sewer system caused by grease, the Borough of Garwood shall have the right to conduct an inspection of any food service facilities establishment connected to the main in which said blockage is found, without regard to any prior or recent inspection(s) thereof.</p> <p><b>D. Violation Discovered:</b> If during an inspection, the Borough discovers a violation of this section, the Borough shall notify the owner and/or operator of the eating and drinking food establishment of the nature of said violation as soon as reasonably possible and, in its discretion, issue a notice to the owner and/or operator for the correction of said violation within seven (7) calendar days thereof. If said violation is not corrected within such time the Borough shall issue a summons in accordance with Section 99-57 of this Chapter.</p>					
<p><b>§ 99-57 Violations and Penalties.</b></p> <p><b>A. Violations of this subsection are subject to the penalty provisions in Chapter 1, Section 1-9 of the General Ordinances of the Borough of Garwood.</b></p> <p><b>B. Recovery of Damages:</b> When the discharge from a food service facility causes an obstruction, damage, or any other impairment to the treatment works, or causes any expense, fine, penalty, or damage of whatever character or nature to the Borough, the Health Officer, or the Superintendent of Public Works, or the Municipal Engineer or their designee(s) or such other person as designated by the Borough, shall invoice the owner for same incurred by the Borough. The owner and/or operator of the eating and drinking food establishment shall be subject to additional fees for any borough labor associated with correcting a blockage, including but not limited to fees for outside contractors, laborers or any other related expenses. If the invoice is not paid within 30 days of receipt, the Administrator of the Borough of Garwood or his or her designee, or such other person as designated by the Borough, shall notify the Borough Attorney to take such actions as shall be appropriate to seek reimbursement.</p> <p><b>C. Remedies Nonexclusive:</b> The remedies provided for in this subsection are not mutually exclusive. The Borough and its various designated agents may take any, all, or any combination of these actions against a noncompliant person.</p>					
<p><b>§ 99-58 Enforcement.</b></p> <p><b>A. Generally:</b> Except as otherwise provided, the Borough of Garwood through its various designated agents or employees shall have the authority to enforce the terms of this chapter and to perform all the duties described herein on behalf of the Borough of Garwood.</p> <p><b>B. Related Authorities:</b> Nothing contained herein shall limit the authority of the Health Officer, or the Superintendent of Public Works, or the Municipal Engineer or their designee(s), or such other person as designated by the Borough, to enter the premises of any food service facilities at all reasonable hours for the purpose of inspecting any water or sewer connection or service equipment, nor limit the authority of the Borough of Garwood to assess penalties for any discharge of grease into the sanitary sewer system.</p> <p><b>Section 2.</b> All ordinances or parts of ordinances in conflict or inconsistent with any part of this Ordinance are hereby repealed to the extent that they are in conflict or inconsistent.</p> <p><b>Section 3.</b> If any section, provision, or part of provision of this Ordinance shall be held to be unenforceable or invalid by any court, such holding shall not affect the validity of this Ordinance, or any part thereof, other than the part so held unenforceable or invalid.</p> <p><b>Section 4.</b> A copy of this Ordinance shall be available for public inspection at the office of the Borough Clerk during regular business hours for the required statutory period.</p> <p><b>Section 5.</b> This Ordinance shall take effect in accordance with all applicable laws.</p>					
<b>NOTICE</b>					
<p>Notice is hereby given that Ordinance No. 20-08 was introduced and passed on first reading at a meeting of the Borough Council of the Borough of Garwood, in the County of Union, State of New Jersey, held on the <b>25th DAY OF JUNE, 2020</b>, and that Ordinance No. 20-08, will be taken up for further consideration for final passage at the meeting of said Borough Council to be held at its meeting held VIA PHONE CONFERENCE, on the <b>9th DAY OF JULY, 2020</b>, at 7:15 p.m., or as soon thereafter as said matter can be heard, at which time and place all persons who may be interested therein will be given an opportunity to be heard concerning the same.</p>					
<p>ATTEST:        Christina Ariemma        Municipal Clerk        Fee: \$349.86</p>
